Ready to use

Translytical Readiness Assessment Template #19

- ✓ technical prerequisites
- ✓ team skills evaluation
- ✓ infrastructure checklist
- ✓ risk assessment matrix
- ✓ implementation roadmap

Is your organization ready for Power BI's biggest evolution?

🚨 Most organizations aren't prepared for Translytical capabilities.

💡 Readiness = Success

✅ Technical infrastructure alone isn't enough.

✅ Team skills and processes matter more than technology.

✅ Documentation infra. is the foundation for safe implementation.

1 Technical Prerequisites

✓ **Fabric capacity** (F2 minimum for testing)

✓ **Power BI Pro** licenses for creators and consumers if SKU smaller than F64

✓ **SQL database** enabled for tenant

✓ **Appropriate permissions** for creating User Data Functions

2 Team Skills Assessment

- ✓ **Python/UDF** development experience

- ✓ API integration and error handling knowledge

- ✓ Business process design expertise

- ✓ Security implementation skills

- ✓ **Documentation and governance** experience

- ✓ Change management capabilities

# 3 Infrastructure & Governance

- ✓ Documentation templates and standards

- ✓ Security and access control frameworks

- ✓ Testing and validation procedures

- ✓ Monitoring and alerting systems

- ✓ Backup and recovery processes

- ✓ Compliance and audit requirements

Risk & Implementation

- ✓ **Risk assessment matrix completed**

- ✓ **Pilot project** identified and scoped

- ✓ **Success metrics** defined and measurable

- ✓ **Rollback procedures** documented

- ✓ **Training plan** for end users

- ✓ **Support and maintenance strategy**
